SoonerCare Launches Statewide Electronic Prescribing Solution

In an effort to increase the quality and cost-effectiveness of health care delivery, the Oklahoma Health Care Authority has partnered with Cerner Corp. to launch an electronic prescribing program for SoonerCare's more than 600,000 members across the state.

Providers for SoonerCare (Oklahoma's Medicaid program) wrote almost 2 million prescriptions in the first six months of the fiscal year. Members get an average of almost four prescriptions per month.

OHCA has planned to implement e-prescribing for quite some time. With passage of the Medicaid Reform Act of 2006, the agency was given approval to design and implement an e-prescribing program.

Cerner's e-prescribing solution provides two-way electronic communication between physicians and pharmacies. Health care providers can use the system to write new prescriptions, authorize refills, make changes, cancel prescriptions, and see if patients have had the prescriptions filled. E-prescribing also has the potential for sharing information such as medication history with other health care organizations.

The program will roll out to 500 SoonerCare providers toward the latter part of 2007.

The solution scope includes a health record, which provides information on patient demographics, visit history, medications and e-prescribing.
